

The selection will determine the type of dimensioning and the corresponding dialog box. A real-time preview allows you to see the settings made. Clicking on the Ok button applies these settings and saves them for the next use of the script.

1. Linear dimension

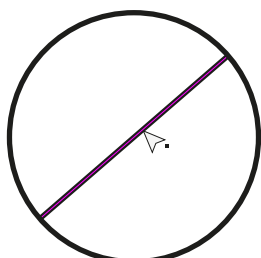

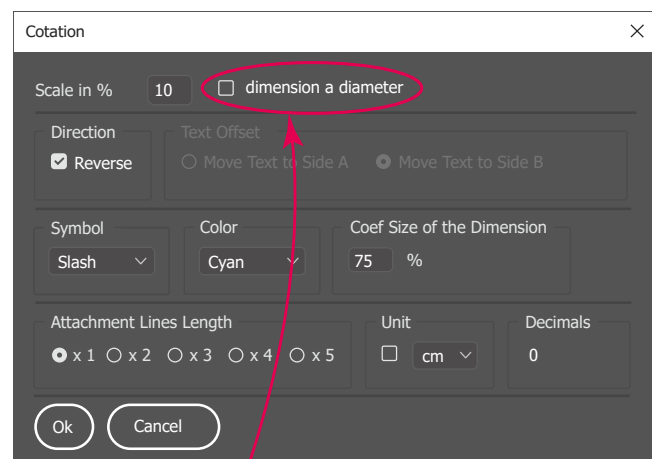

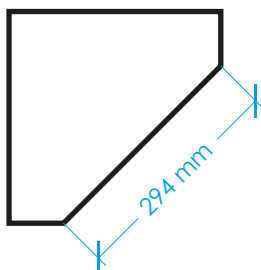

Select an object or a group before sliding the script into the Illustrator space work.

2. Aligned dimension

Select only a segment with the white arrow before sliding the script into the Illustrator space work.

To dimension a diameter:
1. draw a segment and select it with the white arrow.
2. check the box "Dimension a diameter"
